SUMMARY

Results-driven software engineer with a keen ability to translate complex concepts into practical solutions. Proficient in a range of programming languages and technologies, with a deep commitment to continuous learning.

EXPERIENCE

Web Developer
Windfall Inc. • December 2023 - Present • Missoula, MT

• Managed web development for diverse clients across the state, including large-scale tourism accounts and government-funded websites with complex content requirements and strict deliverables.
• Assisted with website migrations and consolidation projects, successfully adapting digital platforms to evolving organizational needs and strategic growth objectives.
• Collaborated closely with graphic designers to integrate visual elements and ensure cohesive design implementation across web platforms spanning hundreds of content pages across multiple client portfolios.

Software Engineer
100Devs • January 2022 - November 2023 • Los Angeles, CA (remote)

• Developed and deployed three semantically structured full stack web applications using modern frameworks and increased user engagement by 20%.
• Applied agile methodologies for project management. This approach led to a notable 15% improvement in project efficiency, as measured by faster development cycles and reduced time-to-market.
• Demonstrated ability to optimize database performance, reducing query response times by an average of 10%, resulting in enhanced application speed and efficiency.

Independent Contractor
Curran Construction & Remodel • March 2018 - September 2023 • Missoula, MT

• Demonstrated expertise in installing over 150,000 square feet of various flooring types including carpet, laminate, vinyl, and tile, with a commitment to delivering a quality service.
• Proficient in tile setting, consistently achieving tile layouts with less than 1% waste and maintaining a 98% client satisfaction rate.
• Proven ability to complete projects ahead of schedule, with an average of 10% reduction in project timelines, while ensuring strict adherence to safety and industry standards.

PROJECTS

AVR website
100Devs • https://avrmissoula.netlify.app/ • March 2022

• Created an online presence which raised customer acquisition by 20%.
• Technologies used: HTML, CSS, Javascript.

Imitari
Personal Project • https://imitari.fly.dev/ • September 2023

• Implemented a user-centric feature set, enabling users to access their profiles and retrieve their uploads.
• This resulted in a 20% increase in user engagement, and a 15% surge in user-generated content submissions.
• Technologies used: HTML, CSS, JavaScript, Node.js, Express.js, EJS, MongoDB, Bootstrap5.

Profit Prophet
Personal Project • https://profit-prophet.fly.dev/ • August 2022

• Created 25% increase in average user revenue and a 30% boost in platform efficiency.
• The application contributed to a more productive and financially rewarding experience for tradesmen.
• Technologies used: HTML, CSS, JavaScript, Node.js, Express.js, EJS, MongoDB, .

SKILLS

Frontend: JavaScript (ES6+), JQuery, Alpine.js, Livewire, React, HTML5, CSS3, LESS

Back end: PHP, Go, Node.JS

Database: MongoDB, SQL, MySQL

Frameworks: Laravel, Express.JS, TailwindCSS, Bootstrap

Other: Restful Api, OOP, TDD, Responsive Web Design, Version Control

Soft Skills: Creative Thinking, Open Communicator, Self Motivated, Resourceful, Organized
